

REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-10-03	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Tube 3,850 long; overall 4,000 with the point

Point: four 4 mm plate triangles welded to a cone, 150 long

Cap disc 76 dia x 6 welded on the top; it takes every blow

Five 12.5 cross holes at 200 pitch, the top one 712 below the cap

Drill the holes square through both walls on one line

Mark a paint ring 2,500 above the point: drive to this ring at the bed

Paint after drilling; leave the bore open to drain

Check: straight within 10 over the length; the pin slides through every hole
