REVISION HISTORY

Version	Date	Author	Change
0.2	2026-10-25	Amish Chadha	Station USD 399 (bank-edge board, O-2); O-6 decided (2026-10-25)
0.1	2026-10-25	Amish Chadha	First market and viability note (stage P1, with the priced BOM of P3); prices checked 2026-10-25

BankHaul market and viability

BankHaul is for small-scale fishers in crocodile water and the associations, wildlife authorities and NGOs that support them. No commercial product that sets and hauls a gillnet from the bank was found, so the benchmarks are the parts it is made of and the main existing mitigation, crocodile exclusion enclosures, which protect water collection rather than fishing. The steel trial station costs USD 399 in parts; the local-materials station that PR-008 aims at is estimated at USD 98 against USD 80. Prices were checked on 2026-10-25. Method: STANDARDS section 23.

Table 1. Market segments.

Segment	Target users and region	Competitive benchmark (cited price)	Estimated cost per unit (USD)	Value proposition
Fisher associations at attack hotspots	Lake Kariba (Zimbabwe, Zambia), Tanzania, Mozambique, Timor-Leste, Indonesia (BKH-PRB-001)	No bank-hauled net system found on sale (to assess); crocodile exclusion enclosures cost to assess	399 (steel trial station, bom/bom.csv); about 98 (local-materials estimate)	Keeps fishing going without wading, where closures and enclosures do not help fishers
Wildlife authorities' conflict programmes	Same regions	As above	399 per station; about 274 a loop with a shared bank post	A mitigation fishers want to use, beside patrols and closures
NGOs and livelihood programmes	Households in conflict hotspots	As above	About 98 for a local-materials station (estimate)	Open drawings and a build plan that local workshops can follow

Table 2. Part price benchmarks (to check the BOM's indicative prices).

Part	Benchmark found	BOM figure	Note
12 mm polysteel rope	GBP 0.55 a metre (Rope Services UK)	USD 54 for 120 m (about USD 0.45 a metre)	Consistent at about USD 0.74 a metre in the UK; local price to confirm
Swivel block for 12 to 16 mm rope	4 inch galvanised malleable single sheave, swivel oval eye, 0.4 t, GBP 27.52 ex VAT (GS Products)	USD 22 each	About USD 37 at 1.34 USD per GBP; the BOM may be low; kept as indicative, to confirm with a local rigging supplier (BKH-DEC-001 O-6, decided 2026-10-25)
Screw ground anchor	Galvanized steel 96 in earth screw anchor, 14 in helix, 16,000 lb, USD 291.99 (GME Supply)	USD 38 each (250 mm helix, 1.6 m)	A heavier class than BankHaul needs; a 250 mm fencing anchor is the right class, price to confirm locally

Open route

A fisher association or an NGO builds stations with a local welder, carpenter and rope worker from the drawings and build plan; the wildlife authority helps site them where its attack records point; researchers measure the effect. CERN-OHL-S keeps changes open. The steel station is the trial version; the local-materials station is what spreads, once the partner has costed it (PR-008).
