WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Tube 200 long, ends square and deburred inside

Lug 8 plate 60 x 80, 18 hole 75 from the collar axis

Weld the lug on the tube's outside, square to the axis, on the centre line

Bore 82.5 over a 76.1 stake: 3 mm clearance all round, so it turns freely

Check: the collar spins on a stake offcut and drops under its own weight
