WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two halves of 55 m from the 120 m coil; tape and melt the ends
Splice a soft eye 80 long round one swivel eye in each half; five tucks
Splice each plain end round the other ring at installation, five tucks; never a hitch
Set the length so the rings lie at the blocks when the loop is snug
Seize the knot's tail and coil any surplus at the ring, never between rings
Check: each ring turns freely on its swivel under a hand pull
