REVISION HISTORY

Version	Date	Author	Change
0.1	2026-10-25	Amish Chadha	First user requirements (kit 1.8 upgrade of a TRL 3 repo), drawn from the users and stakeholders in BKH-PRB-001 Tables 2 and 3; to review with a co-design partner

BankHaul user requirements

What users need, written from their side. The fourteen needs were drawn on 2026-10-25 from the users and stakeholders in BKH-PRB-001 (Tables 2 and 3) and the original requirements R1 to R11; they score the concept options (BKH-OPT-001), and the product requirements that meet them are in BKH-PRS-001 (`03-requirements.md`), linked in the traceability matrix BKH-RTM-001 (`03b-traceability.md`). They remain a desk draft until a co-design partner reviews them with fishers at a trial site. Method: STANDARDS section 22.

Table 1. User requirements.

ID	Category	Title	Need	Priority	Source
UR-001	Safety	Never wade	I can set, check and haul my net without stepping into the water	High	Subsistence fisher (PRB Table 2)
UR-002	Performance	Use our nets	I can use the gillnet I already have, with small changes at its ends	High	Subsistence fisher
UR-003	Safety	Stay back from the edge	I can do the whole job standing well back from the water's edge	High	Fisher; wildlife authority (PRB Table 3)
UR-004	Usability	One person can haul	One person can haul a net with a night's catch without straining	High	Subsistence fisher
UR-005	Performance	Reach the fish	The net reaches 30 m out, where the fish are	Medium	Subsistence fisher
UR-006	Safety	A seized net lets go	If a crocodile or a snag takes the net, it cannot pull me or the station in	High	Fisher; wildlife authority
UR-007	Usability	Fits a fishing night	Setting and hauling take minutes, not an hour	Medium	Subsistence fisher
UR-008	Environment and durability	Stays put	The bank post and the far stake hold in soft, wet banks and muddy beds	High	Fisher association
UR-009	Environment and durability	Lasts a season	It lasts a fishing season of daily use in sun and water	Medium	Fisher association
UR-010	Deployment and assembly	Follows the shore	We can move it as the water rises and falls	Medium	Fisher association
UR-011	Cost	Affordable	A household or association can pay for a station	High	Fisher association; NGOs
UR-012	Maintenance	Made and mended locally	A local welder, carpenter and rope worker can make and mend it from parts they can buy	Medium	Station builder
UR-013	Deployment and assembly	Installed without wading	The far end can be placed from a boat or at low water by two people	High	Boat crew; wildlife authority
UR-014	Regulatory	Allowed where we fish	The station and the way we fish with it are allowed by the wildlife and fisheries authorities	Medium	Wildlife and fisheries authorities

Categories: deployment and assembly, performance, usability, safety, environment and durability, logistics, maintenance, cost, regulatory. Priorities: High, Medium, Low.
